

# Homes for trees, trees for salmon

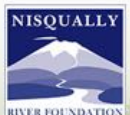

Your new home gives back to fish, forests, and future generations in the Nisqually Watershed by planting trees to replace its own construction

IN PARTNERSHIP WITH

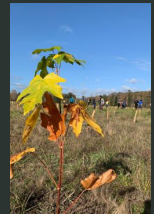

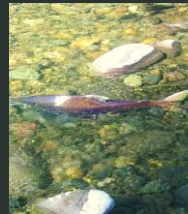

## Restoring local habitat with every home sold

Our community is tied to our environment.

That's why Stefan and the Nisqually River Foundation are partnering to plant 30 native trees (equivalent to the lumber used in the average house) for each home sold. These trees permanently reforest habitat in the Nisqually Watershed, helping secure a healthy future for our salmon, wildlife, and families. These are the values we're proud to share with the community we call home.

Learn more and find out how you can join us for a volunteer planting!
